PROJECTS

Books From Boxes — *Search books via GoogleBooks API and save them to your account after login and verification.*

Technologies used: React, HTML5, CSS, MongoDB, NodeJS, ExpressJS, JWT

Highlights frontend skills in ReactJS and secure user authentication using JWT, with MongoDB backend to store user data.

D&D Stat Compiler — *Allows new players of Dungeons and Dragons to create and use characters with ease.*

Technologies used: JavaScript, HTML, CSS, Bulma, D&D API

First group project, demonstrates foundational skills, a strong commitment to learning, and effective teamwork in a collaborative environment.

How About That Weather — *App that fetches data from OpenWeatherMap API and provides current and 5 day forecasts.*

Technologies used: JavaScript, HTML, CSS, Bulma, OWM API

Showcases proficiency in fetching and integrating APIs and utilizing local storage.

Lets Cook — *Cocktail app lets the user find a new cocktail to try.*

Technologies used: React, MaterialUI, Django, NodeJS, ExpressJS, HTML5, CSS

Built as part of a job application, marking my first project utilizing Django, demonstrating adaptability and quick learning of new frameworks

Gordita Local — *Website that showcases birria taco company.*

Technologies used: React, MaterialUI, JavaScript, HTML, CSS, NodeJS

Currently in development with plans to integrate live Instagram updates and Google API functionality to allow the owner to manage the calendar and schedule of events.
